(Traffic Police ip address)

IP: 108.11.0.1

108.11.0.1 / 8 bits for N/w

Class A = 0-127 - ~~108~~4

108.11.0.1 $\Rightarrow$ 108.0.0.0 - id

N. H. H. H

108.0.0.1 - first ip

255.0.0.0 - subnetmask

108.255.255.254 - last ip

108.255.255.255 - Broadcast

Subnet: It is used to Network partition

conditions: It is put Binary combinations as 1 for Network bits.

108.11.0.1

N. H. H. H

128 | 64 | 32 | 16 | 8 | 4 | 2 | 1, 0.0.0

255.0.0.0

$2^{24} = 16777216$ (-)

16777214

ip = Network + host

class A is a single N/w bits : 8

total number of Host bits = 24

total number of N/w bits $\Rightarrow$

total number of Host octets $\Rightarrow$ 3

total number of N/w octets = 1

Total number of N/w positions = 1

total number of host position = 3
